

Excellence Through Education

Referring Doctors Newsletter | Fall 2009 | Premier Edition Volume 1 No. 1

Educating Our Referring Dentists and Staffs ▾

We continually strive to be state of art in all aspects of Periodontics and Implant Dentistry. Dr. Kolinski and Dr. Crosby journeyed to Montreal Canada for coursework in orthopedic approaches to fixed restorative care. This is the topic of our current 3-part Seminar series which began in the Spring 2009 and continues through Spring 2010. Please see our website: www.midwestdentalimplantology.com For registration information for these courses.

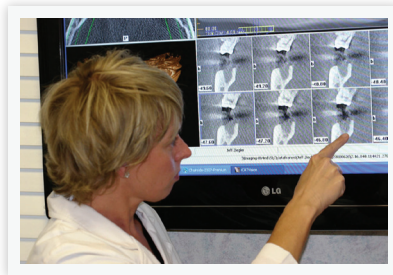

This past spring, we welcomed **Dr. Rick Sullivan**, a Prosthodontist and Researcher for NobelBiocare, as a guest lecturer for a full day continuing education course on Fixed Treatment Options for Edentulous Patients.

Dr. Kolinski will be lecturing next year at the annual session of the American Academy of Periodontology in Hawaii on "Immediate Implant Placement."

We welcome you to enjoy lunch and an informal Powerpoint Presentation in your office. Irene Boltz, RDH, has over 24 years experience in the periodontal and dental implant field. This is an opportunity to forge our relationship with your staff and ours at a time convenient for you. **Call Irene at our office (630-377-4677) to schedule a Lunch and Learn!**

Educating our Community ▾

This spring **Dr. Tricia Crosby** presented "Dental Implants and the Dental Hygienist" at the Fox Valley Dental Hygiene Component meeting.

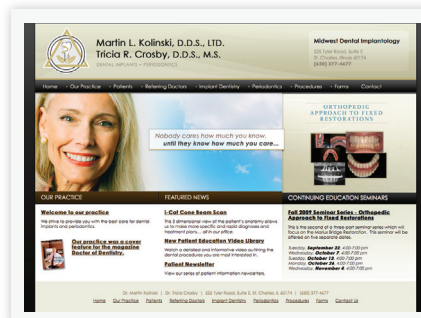

We would be happy to be involved at your local community organization as a guest speaker should your organization be interested in Dental Implant Treatment Options.

Please call Brenda to make arrangements: **630-377-4677**.

Educating Patients via our expanded Website ▾

Our newly updated website has been expanded to provide patient education tools for you and your staff as well as for our patients. We have incorporated a Patient Education Video Library within our website. Many other resources to further educate patients considering restorative options as well as periodontal health are also available with the website. Please take time to visit and explore:

www.midwestdentalimplantology.com

We plan to continue to mail our newsletter to you through August 2010 when we will go "green" and update them via our website only.

Martin L. Kolinski, D.D.S., Ltd.
Tricia R. Crosby, D.D.S., M.S.

Our practice philosophy has always been based on a partnership between our office and our referring dentists. Providing continuing education courses on the latest periodontal and implant practice techniques have been the backbone of that partnership. In an ongoing effort to share more educational information, we are implementing two separate quarterly newsletters. One newsletter will be for our referring dental practices and a separate one will be directed towards our mutual patients. Both of these newsletters will be assessable through our website: www.midwestdentalimplantology.com
