

# THE PROFILE PROSTHESIS

An Update on Case Identification, Treatment Planning and Restorative Technique

Martin L. Kolinski, DDS ♦ Tricia R. Crosby, DDS, MS

## The Profile Bridge/All-on-4 - All-on-6 Concept: Where are we now?

In 2009, we began our first educational seminars discussing this fixed restorative option for the edentulous and terminal dentition patient. In this seminar series we will share the highlights of the over 100 cases we have completed since we began teaching this technique. Since that time we have been able to improve and streamline the procedure making it a somewhat simple procedure even for those who have not previously done cases of this type.

In this seminar series, we will review case identification, update you on the treatment planning of these cases, and offer assistance in presenting this treatment option to your patients as well as guidelines in how to assist your patients to accept this valuable treatment option. We will review the updated step-by-step restorative technique that we have created to allow you to take your patient from an immediate fixed temporary to the final restoration with a minimum of stress and maximum esthetic results.

The Profile Prosthesis is indicated for most patients who wear or who will have to wear complete dentures. The All-on-4 concept – All on 6 concept is a fixed detachable bridge which uses a framework design with subgingival abutment emergence to gain ideal esthetic results in these severely debilitated patients. This approach makes it possible to efficiently treat patients who may have severe bone loss resulting from the extraction of teeth in previous years, or patients in the process of losing their teeth to periodontal disease while still achieving an esthetic result both the patient and the dentist will be proud of.

We hope you will join us in learning and understanding a treatment option your patients are hearing about every day in the news, print and electronic media.

Invitations to  
be mailed out  
in August!

## Seminar Series Fall 2012

Monday, September 24, 2012

Tuesday, October 9, 2012

Wednesday, October 24, 2012

Wednesday, November 7, 2012
