

The Benefits of Collaborative Care for Your Patients and Your Practice

Tricia Crosby, DDS, MS, Martin Kolinski, DDS, William Trahan, DMD, MSD

There is a trend to render dentistry to a commodity by some corporate centers and insurance companies.

These trends not only reduce the focus on patients as people, but also reduce profitability.

Quality collaborative care returns the focus of care back to the patient as a person and increases profitability in the process.

This seminar will demonstrate the value of collaborative care both for your patient and for your practice.

**Hygiene and Staff Seminars will focus on the same topic. Invitations to follow.*
