

DR. TRICIA CROSBY AND DR. WILLIAM TRAHAN PRESENT

What Dentists and Dental Hygienists Need to Know About Implant Maintenance & Peri-Implantitis Prevention

To prevent peri-implant complications, professional in-office assessment, maintenance, and home-care recommendations are vital. For long-term implant success clinicians need to **detect** early signs of implant complications, **diagnose** any complications to provide early intervention and be able to provide peri-implant **treatments**. This course will follow the global healthy implant initiative for ceramic and titanium implants based on Susan's Clinical White Paper: *Long-term prevention of peri-implant complications and textbook: Peri-Implant Therapy for the Dental Hygienist: Second Edition*.

Learning Objectives:

- Learn the current research protocols, tools, treatments, and complications for long-term prevention of peri-implant disease.
- **Detect:** Put into practice biofilm identification, five-step protocol to assess & monitor dental implants.
- **Diagnose:** Understand early intervention guidelines based on American Academy of Periodontology (AAP) peri-implant soft and hard deficiencies.
- **Treatment:** Biofilm-focused titanium and ceramic implant maintenance for all forms of implant-borne restorations / prostheses and early complication treatments.
- **Prevention:** Importance of home-care recommendations for titanium/ceramic implants patients.

SEMINAR DATE

Wednesday

August 16, 2023

TIME

Registration: 8am - 9am

Discussion: 9am - 12pm

Lunch: 12pm - 1pm

Discussion & Q & A: 1pm - 2:30pm

LOCATION

Elgin Community College

The Seigle Auditorium, Bldg E

1700 Spartan Drive

Elgin, IL 60123
